International Master Courses in “PROTECTION AGAINST CBRNe EVENTS”

The evolution and increase in Safety and Security threats at an international level place remarkable focus on the improvement of the emergency systems to deal with crisis, including those connected to ordinary and the non-conventional events (Chemical, Biological, Radiological, Nuclear, and explosives).

In every industrial Country there are multiple entities with specialized teams in very specific fields, but the complexity of the events requires professionals that not only have specific know-how, but also expertise in the relevant areas.

Given the global interest in these issues, the Department of Industrial Engineering and the Faculty of Medicine and Surgery of the Tor Vergata University organize the international Master Courses in “Protection against CBRNe events”: I Level Master Course in “Protection against CBRNe events” (120 ECTS) and II Level Master Course in “Protection against CBRNe events” (60 ECTS). These courses aim at providing attendees with comprehensive competences in the field of CBRNe Safety and Security, through teaching and training specifically focusing on real needs.

The creation of the “Click & Read” newsletter, that connects directly to the International CBRNe Master website simply clicking on the blue titles of each news, would be a monthly appointment about the main news around International CBRNe Master Courses... and more!

Enjoy!!!

1st International CBRNe Workshop "IW CBRNe 2014" "Strategies and solutions to face ongoing global CBRNe threats"

The poster is divided into three main sections. The left section lists sponsors and participants, including NATO, OSAN, Ministero della Difesa, Ministero dell'Interno, ENEA, ARIS, SCURE, ecodc, OSCE, and various sponsors like SELEX, hotzone solutions, BMD, CRISTANINI, GORE, PAC SYSTEM, OTO Melara, PaxLudens, PRINCIPUM, Servizi Pi, and CISINT. The middle section contains the workshop title, date (21 November 2014), and location (Sala Convegni, Engineering Faculty, University of Rome Tor Vergata). The right section provides the workshop's aim and a list of topics: Bioterrorism and biological emergency scenarios; CBRNe mass casualty incidents; Chemical risks; and H2020 and CBRNe collaboration.

1st International CBRNe Workshop "IW CBRNe 2014"
"Strategies and solutions to face ongoing global CBRNe threats"

The aim of this workshop is to give a detailed overview on the actual CBRNe risk scenarios, focusing on:

- Bioterrorism and biological emergency scenarios;
- CBRNe mass casualty incidents: new models of collaboration to counter medical emergencies;
- Chemical risks: Syria and Gioia Tauro;
- H2020 and CBRNe: let's work together!
- New perspectives to face the risk: the civil, military, private, and academic point of view
