International Master Courses in “PROTECTION AGAINST CBRNe EVENTS”

The evolution and increase in Safety and Security threats at an international level place remarkable focus on the improvement of the emergency systems to deal with crisis, including those connected to ordinary and the non-conventional events (Chemical, Biological, Radiological, Nuclear, and explosives).

In every industrial Country there are multiple entities with specialized teams in very specific fields, but the complexity of the events requires professionals that not only have specific know-how, but also expertise in the relevant areas.

Given the global interest in these issues, the Department of Industrial Engineering and the Faculty of Medicine and Surgery of the Tor Vergata University organize the international Master Courses in “Protection against CBRNe events”: I Level Master Course in “Protection against CBRNe events” (120 ECTS) and II Level Master Course in “Protection against CBRNe events” (60 ECTS). These courses aim at providing attendees with comprehensive competences in the field of CBRNe Safety and Security, through teaching and training specifically focusing on real needs.

The creation of the **“Click & Read”** newsletter, that connects directly to the International CBRNe Master website simply clicking on the blue titles of each news, would be a monthly appointment about the main news around International CBRNe Master Courses... and more!

Enjoy!!!

03.03.2016 - Meeting Scientific Committee

Today, 3rd March 2016 is foreseen the meeting of the Scientific Committee of the International Master courses in "Protection against CBRNe events".

The Directive Board will present the results of the previous edition and the new courses that will start in a few weeks.

03.01.2016 - 3rd meeting of the Community of Users on Disaster Risk Management and Crisis Management

Two delegates from the International CBRNe Master Courses are participating to the 3rd meeting of the Community of Users on Disaster Risk Management and Crisis Management, that is taking place in Brussels.

The meeting is a periodic event for CBRNe experts; it is a key moment to exchange views on the progress of European Research projects related to CBRNe issues.

02.29.2016 - Maritime Security Module

The Directive Board of the Master Course is glad to announce that the module called

Maritime Security Module

part of the program of the second level Master Course has been successfully concluded for the first time.

It is an important achievement for the students and the CBRNe Master Course because it can open a lot of new professional opportunities for our students.

The Directive Board want to thank the coordinator of the Course, Commander Attilio Montalto and all the teachers invited during the module both for the lectures and the interesting final exercitation.

It is the results of an important collaboration with the Italian Coast Guard.

[02.18.2016 - Pilot course for an intersectoral audience on staff protection from biological hazards](#)

The ongoing work for the evaluation of the "Pilot course for an intersectoral audience on staff protection from biological hazards" held in Berlin was concluded on Friday, the 19th. Two representatives of CBRNe Master Courses were invited by Public Health England to participate and evaluate the course, organized in cooperation with ECDC.

In few days the pictures of the key moments of the initiative will be published!

This is another example of the fruitful network and collaboration between European Entities and Agencies and the Master.
